

# Build a Modern One-Page Landing Page for FORME PILATES

## Brand Overview

Studio Name: **FORME PILATES**

Display the brand name in uppercase with wide letter-spacing (e.g. F O R M E), set in a refined serif or thin modern sans-serif logotype. The word 'PILATES' sits below or beside it in a smaller, lighter weight.

## Brand Positioning

FORME PILATES is a luxe, minimalist boutique Pilates studio in Singapore. The brand should sit in the same aspirational wellness-lifestyle territory as **Alo Yoga**: studio-to-street, clean and editorial, where wellness is identity and self-expression — not just exercise.

Brand association cues (Alo Yoga-inspired):

- Wellness as a lifestyle and aesthetic, not a chore
- Studio-to-street sensibility — imagery of women in elevated athleisure, in and out of the studio
- Mirror selfies, matcha runs, and morning-routine energy — aspirational but attainable
- Editorial, campaign-style photography with soft natural light and negative space
- Quiet-luxury tone: confident, calm, minimal copy — never loud or salesy

## Target Audience

Millennial and Gen Z women in Singapore (ages 20–40): young professionals, students, and new mums who discover fitness brands through Instagram and TikTok, wear athleisure as fashion, value wellness as self-care, and book everything from their phones.

## Objective

Create a modern, high-converting, editorial one-page landing page for FORME PILATES.

The primary goal is to generate qualified leads through a trial class booking form and an attractive intro offer.

Use only:

- HTML5
- CSS3
- Vanilla JavaScript

Do not use:

- React
- Vue
- Angular
- Bootstrap

- Tailwind CSS
- jQuery
- Backend frameworks

The entire website should be contained within a single `index.html` file with embedded CSS and JavaScript.

---

## Design Requirements

### Overall Style

The landing page should look like a luxury wellness brand's campaign site — monochrome, editorial, and gallery-like. Think Alo Yoga's web aesthetic translated into soft grey monochrome: large imagery, thin typography, abundant negative space.

Design characteristics:

- Strict monochrome palette — contrast does the work, never colour
- Clean, airy, editorial layout with generous white space
- Mobile-first design — assume 80%+ of traffic comes from Instagram/TikTok link clicks
- Sharp or very subtly rounded corners (max 4px) — avoid bubbly, playful shapes
- Thin serif display font for headlines (e.g. a Didone or modern serif), geometric sans-serif for body and UI
- Uppercase, letter-spaced micro-labels for section eyebrows (e.g. 'T H E M E T H O D')
- Black-and-white or desaturated grey-toned photography — candid movement, elevated athleisure, diverse Asian representation
- Conversion-focused layout with sticky mobile CTA button in charcoal

### ***Tone of Voice***

Copy should be:

- Calm, confident, and minimal — fewer words, more weight
- Empowering and aspirational, never intimidating or body-shaming
- Focused on how you feel and who you become — strength, poise, ritual, presence
- Warm beneath the polish — still feels like a brand run by real women
- No exclamation marks in headlines; restraint reads as luxury

### ***Color Palette***

Use CSS variables. Monochrome with soft grey as the base — no accent colours. Hierarchy and emphasis are created through contrast, weight, and spacing:

```
:root {
  --fog: #F5F5F4;          /* fog white   - page background */
  --dove: #D9D9D6;         /* dove grey  - cards, dividers, borders */
  --stone: #A8A8A4;        /* stone      - secondary text, captions */
  --graphite: #5C5C59;     /* graphite   - body text */
}
```

```
--charcoal: #1F1F1E; /* charcoal - headlines, CTAs, footer bg */
--white: #FFFFFF; /* pure white - cards on fog background */
}
```

Usage rules:

- Backgrounds alternate between fog (#F5F5F4) and pure white sections; footer and final CTA banner use charcoal (#1F1F1E) with fog text
  - Primary CTA buttons: charcoal background, fog text, no border radius beyond 2–4px; hover inverts to fog background with charcoal text and a 1px charcoal border
  - Secondary CTA: transparent with 1px charcoal border
  - All photography treated in black-and-white or heavily desaturated grey tones to stay on-palette
-
